DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a package, classified in class 206, subclass 526.
 - II. Claims 21-24, drawn to a method of making a package, classified in class53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process could be used to make a banana with a tag on it, inside a bag.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Mr Robert Barrett, Attorney for the Applicant, on July 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
